### DETAILED ACTION

1. Claim 1 is pending. Claims 2-18 have been cancelled.
2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hong et al (Reference B9, cited by applicants).

The instantly claimed compound is disclosed by Hong et al. At page 2, see the generic formula (I). Additionally, see the compound at page 89, column 1, Example 179. The difference between the prior art compound and the instantly claimed compound is the selection of the specific salt. At page 7, lines 22-37, the reference teaches salts of the compound such as trifluoroacetic acid and methanesulfonic acid. It would have been obvious to one of ordinary skill in the art to interchange one salt for another when specific salts are taught as equivalents and the antibacterial utility is retained. Accordingly, the instant claim is obvious therefrom.

4. Reference CN 1,114, 959 is equivalent to US 5,633,262 (Reference A4). A foreign translation of CN 1,114,959 is not provided.
